

Urmston Grammar School

Dear Parents/Carers,

I am writing to inform you about the upcoming **Interim Mathematics Assessment** taking place for all Year 9 students. They have been set the following instruction on Satchel One, alongside the necessary topic list. We ask for your encouragement to ensure thorough preparation from your child.

“Your Interim Maths Assessment will take place on Friday 9th January in your maths lessons. The test will be **non-calculator**. You must ensure that you have a **pen, pencil, ruler, compass and protractor**. If necessary, these can be purchased with cash from the finance office.

Please refer to the attached **topic list** to see exactly what you will be tested on.

General Revision tips:

- There is no expectation for you to do every single topic, but we do expect you to prepare thoroughly for the assessment. Some topics may need more attention than others.
- DFM key skills numbers are matched with each topic on the topic list.
- Your class teacher will also provide you with some revision materials, but these should not be the only revision you complete.
- The link to the whole year’s revision worksheets is attached to this satchel post. Choose your level of difficulty from ‘support’, ‘core’ and a ‘depth’.
- You can also re-attempt specific questions from your previously completed unit assessments to focus on areas highlighted from your review sheets and familiarise yourself with exam style questions.

If you have any issues, please speak to your class teacher.”

Many thanks for your continued support.

Kind Regards,
Mr R Prastka
