**Re: Design and Technology Project Contribution**

Dear Parent/Carer,

Throughout the academic year, students in Lower School take part in a range of exciting Design and Technology projects. These include creating products such as mood lamps, speakers, and fairground rides, as well as opportunities to explore further design work during extra-curricular sessions.

These projects involve electronic and mechanical systems and use a variety of high-quality components, such as pulleys, gears, microprocessors, rainbow LEDs, and speakers. In addition to these components, there are material costs for casings and prototype development.

To help support the continued delivery of these engaging and hands-on learning experiences, we kindly ask for a voluntary contribution of £5–£10. This contribution will go directly towards the cost of materials and components for student projects.

Payments can be made via ParentPay, which can be accessed through the school website.

Thank you for your continued support of our Design and Technology department. It is greatly appreciated.

Yours sincerely,

**Mr T. Barber**
Head of Design and Technology
